

## Eclipse Startup Instructions

### Creating a Project

1. Choose *File, New, Project* to display the New Project wizard.
2. Select *Java Project* and click *Next* to display New Java Project wizard.
3. Type *myjavaprograms* in the Project name field. As you type, the Directory field becomes c:\smith\myjavaprograms.
4. Make sure that you selected the options *Create project in workspace* and *Use project folder as root for sources and class files*.
5. Click *Finish* to create the project.

### Creating a Class

1. Choose *File, New, Class* to display the New Java Class wizard.
2. Type Welcome in the Name field.
3. Check the option *public static void main(String[] args)*.
4. Click *Finish* to generate the template for the source code Welcome.java.

### Compile and Run a Class

To run the program, right-click the class in the project to display a context menu. Choose *Run, Java Application* in the context menu to run the class. The output is displayed in the Console pane.
